GET/bibles
List Available Bibles

🔒

Lists Bible objects authorized for the current API Key. This includes Creative Commons and Public Domain Bibles, as well as any Bibles licensed via a **Starter** or **Pro Plan**.

A Bible object represents a single translation (NIV, ESV, etc.) of the Bible. Each Bible is accessible via its **Bible ID**, a string consisting of a 16-digit unique string followed by a *publication number* (-01 , -02). A few popular examples are:

Bible	Bible ID
New International Version (NIV)	78a9f6124f344018-01
New American Standard Bible (NASB)	a761ca71e0b3ddcf-01
Christian Standard Bible (CSB)	a556c5305ee15c3f-01

Parameters

Try it out

Name	Description
language	ISO 639-3 three digit language code used to filter results
string (query)	eng
abbreviation	Bible abbreviation to search for
string (query)	NIV
name	Bible name to search for
string (query)	New International Versior
ids	Comma separated list of Bible Ids to return
string (query)	78a9f6124f344018-01,a7
include-full-details	When true , the returned Bibles will include additional Bible details (e.g. copyright and promo info)
